Andheri(E), Mumbai

SUMMARY

Experienced Software Developer with 5+ years of expertise in C#, ASP.NET, ASP.NET Core, Web API, MVC, and SQL. Passionate about building scalable web-based applications and applying design patterns to deliver efficient solutions. Skilled in translating business requirements into technical implementations, with strong analytical abilities, problem-solving skills, and a collaborative mindset.

EXPERIENCE

01/2021 - 03/2024

Mumbai

Software Developer

HealthAssure Private Limited

HealthAssure is a healthcare technology company providing online health services

- Redesigned and developed the company's web application using ASP.Net MVC and C#
- Implemented new features in the existing client portal, improving client satisfaction
- Worked on generating and exporting reports to Excel and PDF
- Provided IT support, ensuring uninterrupted service and resolving technical issues promptly
- Collaborated in a team to understand project requirements and deliver web solutions

03/2024 - 05/2025

Mumbai

Software Developer

ZingHR

ZingHR is a human resource management software company focusing on enriching employee experiences

- Developed and enhanced multiple APIs, including implementing Token generation for secure data retrieval
- Contributed to API improvements and logic enhancements to meet new requirements
- Integrated client-side functionality with backend systems

05/2025 - Present

Mumbai

Senior Software Developer

Clover Infotech

IT Services and Consulting company specializing in digital transformation, cloud, and enterprise solutions

- Working on HDFC Bank project, developing C# console applications for automated schedulers.
- Implemented SFTP integration to support secure file handling and scheduled operations

PROJECTS

Doctor's Questionnaire and Report Generation System

Built a web-based questionnaire system that captured patient responses, generated PDF reports, and stored them securely on AWS for easy access.

- Developed a web-based form system where doctors could enter patient responses to medical questionnaires.
- Upon saving, the system generated a structured PDF report with all questions and answers using iTextSharp and stored the files securely on AWS.
- This solution made it easier for doctors to collect patient information, generate reports instantly, and store them securely.

Data Upload and Report Generation Utility

Developed a client-focused utility for data upload, validation, and Excel reporting, simplifying data handling and improving reporting efficiency.

- Developed a utility tool to manage client-specific datasets by enabling CSV/Excel uploads, validating records, and generating structured Excel reports.
- Built with ASP.NET MVC, SQL Server, jQuery, and EPPlus, the tool provided an easy-to-use interface for managing large datasets and creating accurate reports.
- The solution improved data import/export efficiency, reduced manual errors, and provided clients with a reliable way to handle and analyze data.

Project Migration and AWS Optimization

Supported migration projects by upgrading applications and configuring AWS S3 for secure storage and optimized artifact management.

- Contributed to migration projects by upgrading applications to newer versions with the latest technologies and AWS.
- Configured and managed AWS S3 buckets for secure storage and efficient handling of deployment artifacts.

Service API for Project Delegation

Built a delegation system that allowed managers to grant temporary approval rights to their personal assistants during absences.

- Developed APIs and backend logic using ASP.NET Core, MVC, and MySQL, supporting both web and mobile applications.
- Streamlined transaction approvals to ensure continuity and efficiency when managers were unavailable.

PROJECTS

RainBow Integration

Developed a data integration solution to enable seamless transfer of client data into internal systems.

- Built using ASP.NET Core, MVC, and MySQL with backend logic for efficient data handling.
- Improved data accuracy and transfer efficiency through reliable integration workflows.

SFTP XML Processing and CSV Generation Utility

Created a console application to fetch XML files from an SFTP server and process them using deserialization.

- Implemented mapping logic with shared documents to transform the extracted data.
- Generated structured CSV files and uploaded them back to the SFTP server for secure storage and accessibility.

STRENGTHS

Interpersonal Skills

Strong analytical and problem-solving skills, with a focus on building scalable and maintainable solutions.

Quick learner with adaptability to new technologies and frameworks, ensuring continuous growth and innovation.

Effective communicator and collaborator, experienced in teamwork, client coordination, and delivering business-focused solutions.
